MECHANICAL RULES & REQUIREMENTS FOR VEHICLES

RADIATORS, GAS TANKS & BATTERIES

- It is permissible to relocate the radiator to the rear of the vehicle.
- The radiator must be mounted in a rigid manner so there is no risk of it bouncing loose or becoming disconnected.
- It is permissible to disconnect and remove the stock fuel tanks and utilize an alternative fuel cell. Fuel cells must also be mounted with safety in mind, featuring rigid, secure mounting systems.
- All electrical wiring must be routed away from the cell to avoid any potential combustion issues.
- Front radiator and oil pan shielding allowed
- Gas tank and fuel systems left in original position, or safely relocated
- Battery tied down and Covered

SUSPENSION & 4-WHEEL DRIVE

- Stock suspension (OEM or Aftermarket suspensions are okay, no performance shocks, no changing geometry or mounting locations, okay to reinforce suspension and shock mounting must remain stock)
- Four Wheel Drive Trucks-Front shaft must be removed.
- Four wheel drive cars-rear shaft must be removed

TIRES & MUD FLAPS

- NEW any street legal or DOT approved tire. Air only implements. Beads on tires may be screwed to rims. No split rims.
- All Vehicles must have properly secured and sized mud flap

BUMPERS & AIR BAGS

- Similar to stock bumpers only, no sharp edges or over built bumpers
- . Air. bags must be removed

DOORS

- Doors have to remain shut at all times.
- Doors must be chained.
- Door bars are allowed

OTHER VEHICLE RULES

- Tow point on front and back of vehicle
- Access point to the hood, we must be able to get under the hood in case of engine fire
- Vehicle number must be clear and legible on both sides of vehicle. A vertical number must also be attached to the roof and legible from both sides.
- All loose items, garbage, etc. must be removed from inside the car prior to arrival at the track

We strongly encourage a full roll cage with halo or a have a 4 point roll cage that is welded or bolted to be fastened securely ,it must be made from at least a 1-1/4 inch diameter and .095' thickness. The cage must be inside the car within two inches of the roof. and truck and minivan cages must exceed 4 inches above the roof line (We strongly encourage the use of 1 ½ inch OD tubing by 11 Gauge wall ERW STEEL TUBE

Vehicle inspections are performed. Vehicles will be inspected after pulling through the gate to the inspection area. If a vehicle fails inspection, the driver will have the opportunity to correct the problem and will be allowed to be re-inspected. NO vehicles may be removed from the trailer without passing inspection. Once a vehicle passes inspection it will be given a visible indication that it has passed and be allowed to be unloaded.

After inspection the driver must complete the registration form. At that time the driver will also choose a washer containing a number. This number is used to determine the first heats gate pick. Second heat pole positions will automatically be the opposite of the first heat, allowing all racers to have a front row start in one heat. A limited number of vehicles will be allowed to race in each class and this will be determined by the Race Officials based on the number of total vehicles registered in all classes.

Driver will be allowed two laps, as a practice session. This is meant to familiarize the drivers with the track and track conditions. It is not meant to be a race or driven in an aggressive manner. Track staff will help monitor the number of laps being driven as well as watching for aggressive driving.

All heats and pole positions will be announced. Drivers are responsible for verifying they are in the correct heat. Classes and heats will be called to the staging area by our announcer and our staging director will send the cars to the starting area where they will be set into their starting locations by the track staff.

The starting personnel will point at each vehicle and wait for a "thumbs up" from each driver. Once all drivers are ready, the starter will raise the green flag to start the race.

All vehicles will race each other for the specified amount of laps. Aggressive Dangerous Driving will not be allowed. If a driver is identified as driving aggressively the track staff will point at the driver with a rolled or furrowed flag. This is considered a warning. If the aggressive driving continues, the track staff will wave a black flag at the vehicle and the driver is disqualified for that heat and must pull off the track.

Track staff will use a yellow flag to signify that a there is an issue ahead of them on the course. Drivers may continue but must pass through the area in a slow and safe manner.

Should the race need to stop due to a rollover, accident, mechanical breakdown, fire, etc., a red flag will waved by track staff At that point the racing Is stopped and drivers are expected drive back to the starting area and line up single file in the position they were in at the time of the incident.

At the start of the final lap of racing, finish line track staff will display a while flag signifying you are now on your last lap of that race.

A checkered flag will be used as drivers cross the finish line at the end of the race.
